In re Application of

Charles H. Tabb et al

Application No. 10/722,153

Filed: November 25, 2003

Attorney Docket No. 24800-RA

DECISION ON PETITION
TO MAKE SPECIAL UNDER

37 CFR 1.102(c)(2)

This is a decision on the renewed petition under 37 CFR 1.102(c)(2)(i), filed November 23, 2003, to make the above-identified application special based on the invention materially enhancing the quality of the environment, as set forth in M.P.E.P. § 708.02, Sections V.

The petition is **DISMISSED**.

A grantable petition to make an application special under 37 CFR 1.102(c)(2)(i) and MPEP § 708.02, Section V: Environmental Quality, must state that special status is sought because the invention materially enhances the quality of the environment by contributing to the restoration or maintenance of basic life-sustaining natural elements. If the disclosure is not clear on its face that the claimed invention materially enhances the quality of the environment by contributing to the restoration or maintenance of one of the basic life-sustaining natural elements, the petition must be accompanied by a statement by the applicant, assignee, or an attorney/agent registered to practice before the Office explaining how the materiality standard is met. No fee is required.

While applicants' invention may prevent concrete spills, there is little factual evidence that the invention "materially enhances the quality of the environment of mankind by contributing to the restoration or maintenance of the basic-life sustaining natural elements." The claimed invention does not appear to have a significant impact on the restoration or maintenance of the basic life-sustaining elements over the currently used devices. The contribution of applicants' invention, while beneficial to the environment, does not rise to the level intended by the Rule.
